

Project Candlelight

Please join us during
Coerced Abortion Awareness Week

Sunday, April 3 - Sunday April 10, 2011
Shed new light, share new hope.

Did you know that most abortions are unwanted or coerced? That forced abortions are happening close to home? That homicide is the #1 killer of pregnant women?

The aftereffects of abortion are equally heartbreaking. Many women suffer significant physical injury and emotional heartbreak over pre-abortion and post-abortion issues, but above all over the loss of a child. Most experience symptoms of post-traumatic stress. Maternal death rates are nearly 4 times higher. Women are dying, too.

Teens are especially at risk of coercion in schools and elsewhere, plus serious injury and aftereffects, including a higher risk of suicide.

April 3-10 is Coerced Abortion Awareness Week. During April, which is also Abortion Recovery Awareness Month, please join Project Candlelight — our church's education and outreach project. We'll be educating others, sharing new resources, and offering help, hope and healing for those in our own midst directly or indirectly at risk of or hurt by abortion.

Check the bulletin for details about events and resources. Learn more about these issues at www.theunchoice.com.

**Abortion endangers the rights and lives
of *both* the unborn and women.**
