

# Bulletin Ads & Clip Art

Most people don't realize that most abortions are unwanted or coerced, or that forced abortions happen close to home. This heartbreak is often followed by psychological and physical injuries that traumatize, maim and even kill women. Abortion endangers the rights and lives of both the unborn and women.

You can help raise awareness and foster compassion, hope, help and healing. Use these ads for your church bulletins, newsletters, newspapers and other publications in print and online.

## **Project Candlelight** Please join us during **Coerced Abortion Awareness Week**

Shed new light, share new hope.

Did you know that most abortions are unwanted or coerced? That forced abortions happen close to home, and homicide is the #1 killer of pregnant women? Not surprisingly, after abortion, women suffer significant injury, heartbreak and even higher death rates. Many experience symptoms of post-traumatic stress. Teens are especially at risk of coercion in schools and elsewhere, and may face serious injury and aftereffects, including a higher risk of suicide. April is Abortion Recovery Awareness Month, and April 3-10 is Coerced Abortion Awareness Week. Please join our church's outreach project. Help others by sharing new evidence and resources, and offering hope, help and healing for those at risk of or hurt by abortion. Check our church bulletin for details or contact our Project Candlelight coordinator. Learn more about unwanted and coerced abortions at [www.theunchoice.com](http://www.theunchoice.com).

## **Project Candlelight** **Shed new light. Share new hope.** Join us during **Coerced Abortion Awareness Week**

Most abortions are unwanted or coerced, many forced. Aftereffects are serious, too. Help those at risk or hurt. Watch our church bulletin for details, or contact our Project Candlelight coordinator.

## **If most abortions involve coercion, why are we still calling it a choice?**

- 84% were not adequately informed before abortion,
- 64% were pressured by others to abort,
- 52% felt rushed and 54% felt unsure, yet ...
- 67% received no counseling before abortion, and
- 79% were not told of alternatives.

**Coerced Abortion Awareness Week is April 3-10**  
Watch the bulletin for more information about our church's events and outreach or contact the Project Coordinator.

## **Project Candlelight** Please join us during **Coerced Abortion Awareness Week**

*April 3-10, 2011*

Shed new light, share new hope.

Did you know that most abortions are unwanted or coerced? That forced abortions are happening close to home? That homicide is the #1 killer of pregnant women? Not surprisingly, after abortion, most women suffer significant physical injury and emotional heartbreak. Many experience symptoms of post-traumatic stress. Teens are especially at risk of coercion in schools and elsewhere, and can face serious injury and aftereffects, including a higher risk of suicide.

April is Abortion Recovery Awareness Month. April 3-10 is Coerced Abortion Awareness Week. During April, please join our church's education and outreach project. We'll be educating others, sharing new, evidence-based resources and offering hope, help and healing for those in our own midst who are directly or indirectly at risk of or hurt by abortion.

Check our church bulletin for details or contact our Project Candlelight coordinator.
